- Computing
- Video Editing
- Sound Engineering

■ Professional Profile

I am hard-working and experienced, adept at dealing in fast-paced environments, including difficult conditions, such as long and unsocial hours. My main strengths include strong communication and interpersonal proficiency, rapid problem resolution and unwavering dedication.

■ Career History

Project Manager | HSH Productions (2023 – 2025)

After running a business for two years, several companies approached us with offers to merge our client-base with theirs. We successfully joined forces with HSH Productions, which involved managing our clients, directing their events through this new company. My main role specialised in Sound Engineering, managing the audio requirements for events, specifically mixing and sound design.

Company Director | LJS Event Services (2021 – 2023)

As soon as I finished uni, I was presented with an opportunity to help build an events company, providing sound, lighting and production to weddings, conferences and functions alike. I started as an employee, but soon invested time and money to help grow the business, which led to being promoted into a Company Director position, where I helped run the marketing, financials, logistics and technical requirements for our events.

■ Education

Liverpool Institute for Performing Arts

2:1 Degree in Music Technology

John Hampden Grammar School

3 A-Levels (A, B, B) in Economics, Maths and Music Technology
